Framework data storage mechanism								
	Central		X				X	
	Resource pool			X	X	X		X
	Database Structure			X				X
Data storage resources								
	Local							
	Central Server							
	External resource pool							
Source code							X	X
Scalability								
	Scale by adding more resources		X	X	X	X	X	X
	Scaling on demand by adding more resources			X				X
	Auto-scaling and auto down-scaling			X				X
Availability								
	Falut tolerance			X				X
Easy modern cloud integration support								X
Countinous deployment					-	-		
	Independent service deployments			X				X
	Update with moving code to existing code base		X				X	
Architecture								
	Distributed client server		X					
	Monolithic distributed				X	X	X	
	SOA			X				
	Microservice							X
Loose coupling								

		*	FEWS	LEAD	MADIS	DIAS	MSM	WDIAS
	Programming language independent							
Extendability								
Extendable data integration support								
Data preprocessing			X	X	X	X	X	X
	Add new preprocessing capabilities independently		X	X		-		X
	Add new preprocessing capabilities without any downtime			X			X	X
	Run preprocessing with auto-scaling			X				X
Workflow engine			X	X			X	
Model execution and integration			X	X			X
